EXPERIENCE

PricewaterhouseCoopers Private Limited - Technological Consultant

September 2024 – Present

- Developed various Generative AI solutions as a Technological Consultant at PwC, enabling innovation across multiple industries.
- Developed and implemented 3+ AI-driven solutions to solve complex business challenges and optimize operations.
- Led data analysis and predictive modeling to improve decision-making and business performance.
- Advised 5+ clients on emerging technologies, ensuring seamless adoption and maximum impact.

PricewaterhouseCoopers Private Limited - Technological Consultant Intern

January 2024 – September 2024

- Gained hands-on experience in generative AI, applying LLM techniques to extract meaningful insights.
- Produced and worked on Python Flask APIs, contributing to the product's backend functionality.
- Enhanced proficiency in Python, using advanced features for data manipulation and reporting.

Airports Authority of India, Ranchi- Apprenticeship

May 2023 – July 2023

- Conducted analysis of airline cancellation data(for the year 2019) during my internship at Airports Authority of India, identifying key trends and patterns.
- Gained insights into air traffic control operations and equipments, understanding regulatory frameworks, and aviation logistics.

PROJECTS

LLM-Powered Invoice Data Extraction System, PwC Noida

- Built an intelligent invoice data extraction system using Large Language Models (GPT-4, Phi-4, LLaMA 3.1, and Claude) to automate processing of 22+ structured and unstructured invoice fields.
- Designed and implemented advanced dynamic and meta prompting techniques to enhance adaptability across diverse client requirements as well as document formats.
- Developed and integrated custom Python-based business logic and prompt pipelines, tailored to client-specific rules and edge cases, ensuring high reliability and performance.
- Incorporated NLP features such as entity recognition and document summarization to support specific client use cases and enable smarter downstream automation.

Digital Workmate User Interface(React.js + Django)

- Developed a user-friendly interface using React.js and Django to showcase the lifecycle of uploaded, processed, and reviewed documents.
- Integrated drag-and-drop agent creation using react-flow, allowing users to visually configure and manage document processing workflows.
- Designed and implemented MySQL-backed data models to store structured information, including invoice metadata, processing status, and review logs.
- Enabled real-time visibility into processed and reviewed documents, with built-in functionality to export invoice data to Excel for reporting and analysis.

POSITIONS OF RESPONSIBILITY

Training and Placement Coordinator
